Dkt. 2271/6825

including:

responding to an initial order entered at the customer ~~side~~  
for a specified product and quantity thereof that is  
in a third range higher than the second range by  
delivering to the customer side display information  
indicative of at least a second promotion that is  
different from the first promotion and is functionally  
related to the initial order that is in said third  
range; and

in response to an entry of a second revised order at the  
customer side conforming to the second promotion,  
delivering to the customer side order processing  
information for said second revised order.

3. (original) A method as in claim 2 in which said first  
promotion is for a retail sales transaction and said second  
promotion is for a business-to-business transaction.

4. (previously presented) A method as in claim 3 in which  
said information indicative of a first promotion includes  
information regarding a difference between the initial order  
quantity and a quantity for qualifying for the first promotion.

5. (previously presented) A method as in claim 4 in which  
said customer side and seller side are at geographically remote  
locations.

Page 5

Dkt. 2271/63926

8. (original) A method as in claim 6 in which the ~~second~~ screen includes the information regarding the at least one promotion only when the initial produce order is within a selected range.

9. (previously presented) A method as in claim 8 in which the selected range is in terms of quantity of items of the same product included in said initial product order.

10. (original) A method as in claim 6 including displaying at the customer side information regarding a difference between the initial product order and an order that would qualify for the at least one promotion.

11. (original) A method as in claim 6 in which the second screen includes information regarding a first selected promotion when the initial product order is within a selected first range but a second selected promotion when the initial product order is in a second range.

12. (original) A method as in claim 11 in which the second range is higher than the first.

13. (original) A method as in claim 11 including displaying at the customer side information for a business-to-

Mika PARTAIN et al., S.N. 09/760,864  
Page 6

Dkt. 2271/6126

business sales transaction when the initial product order is in the second range.

14. (original) A method as in claim 11 including displaying at the customer side order processing information for a retail sale when the initial product order or the revised product order is in a first range but for a business-to-business sale when the initial product order or the revised product order is in a second, higher range.

15. (previously presented) A method of carrying out a sales transaction over a network comprising:

displaying an ordering screen at a customer side containing information regarding at least one product and entering an initial product order including information identifying a product and quantity being ordered;

displaying a promotion screen at the customer side containing information regarding at least one selected promotion when the initial product order has a selected characteristic, wherein no promotion is displayed at the customer side if the initial product order does not have the selected characteristic;

providing for the entry of a revised product order at the customer side following a display of said at least one selected promotion; and

Page 7

Dkt. 2271/5726

completing the sales transaction in accordance with ~~said~~  
revised product order when such is entered but in  
accordance with the initial product order when ~~the~~ at  
least one selected promotion was not displayed ~~because~~  
the initial product order did not have the ~~selected~~  
characteristic or when no revised product order ~~was~~  
entered, but processing the sales transaction in  
accordance with the revised product order when ~~such~~  
was entered.

16. (original) A method as in claim 15 in which ~~said~~  
characteristic includes a quantity of products included in ~~said~~  
initial product order.

17. (original) A method as in claim 16 including  
displaying at the customer side a promotion screen for a retail  
sales transaction when said selected characteristic is indicative  
of a retail order but a promotion screen for a business-to-  
business sales transaction when the selected characteristic is  
indicative of a business order.

18. (original) A method as in claim 17 in which the  
selected characteristic is at least one a quantity of a product  
and a total price of said initial product order.

19. (original) A method as in claim 18 in which said

Dkt. 2271/63926

promotion screen is for retail transaction when at least one of a quantity of products and total price of said initial product order is within a first range but is for a business-to-business transaction when at least of a quantity of product and a total price of said initial product order is in a second, higher range.

20. (previously presented) A system for promoting product sales in Internet transactions comprising:

a customer side computer facility and a seller side computer facility each coupled with the Internet and sending information to the other only over the Internet;

said customer side facility having a display for information received from the seller side facility and an information entry device for entering information sent to the seller side facility through the Internet;

said customer side facility sending to the seller side facility information indicative of an initial order for a product and, depending at least on the quantity of the product, the seller side facility responding by executing the order or sending to the customer side facility information describing at least one promotion functionally related at least to said quantity, only if said quantity meets or exceeds a minimum quantity, wherein no promotion is displayed at the customer side if the quantity of the initial order does not meet or

Page 9

Dkt. 2271/53926

exceed the minimum quantity;  
said customer side facility selectively responding to said information regarding said promotion by sending to the seller side facility information indicative of a revised order conforming to said promotion; and  
said seller side facility responding to a revised order from the customer side facility by executing the revised order rather than the initial order.

21. (previously presented) A method for promoting product sales in Internet transactions comprising:

providing a user interface at a customer side for ordering products by entering order information at the customer side for transmission to a seller side via the Internet;

comparing a specified quantity of an initial order entered at the customer side for a specified product to a minimum quantity, the specified quantity being in a first selected range;

displaying at the customer side information indicative of a promotion functionally related to the initial, only if the specified quantity of the specified product is higher than the minimum quantity, wherein no promotion is displayed at the customer side if the specified quantity does not meet or exceed the minimum quantity;  
and

Mika PARTAIN et al., S.N. 09/760,864  
Page 10

Dkt. 2271/5826

in response to an entry of a revised order at the customer  
side conforming to the first promotion, delivering to  
the customer side order processing information for  
said revised order.
